

Innovative Product Development, On Demand

At Stratos, we know a cohesive, brilliant team of developers can't be built overnight. Since 1987, we've been building a superior ecosystem for innovative product development. Expert industrial designers, software developers, electrical, mechanical, manufacturing and quality engineers and professional project managers are here to support your next product development challenge. Our collaborative, cross-discipline approach enables us to reduce time-to-market, maximize product opportunities and create compelling product solutions for users and unmet needs in the marketplace. We partner with clients worldwide, from start-up companies to Fortune 500 corporations.

Some of our clients include:
